

AS149 LW

cowl vent grilles/leaf screens

Mytex AS149LW is an engineered polyolefin that was developed to be used for Cowl Vent Grille applications. This resin has years of commercial success. The high flow characteristics help fill these large applications through difficult vent meshing. The material also has been designed for optimal weathering and is also recyclable so scrap can be added back into production parts.

key material advantages

- Increased Processability for Large Flow Distances
- Dimensionally Stable for Large Application Tolerances
- Superior Weathering Characteristics for Horizontal Surfaces
- Chemical Resistance
- Recyclable
- Does Not Need to be Dried
